

EXPAND THEIR WORLD WHILST KEEPING THEM SAFE

A study trip abroad is an unforgettable experience for a student. But it should not be for the wrong reasons. Actively managing health and security risks is the only way to ensure a safe and successful trip - and it has added benefits, too.

PROTECT YOUR COMMUNITY

Know that your students and staff are safe when they are away from home. Protect your school's reputation with visible, best practice processes.

STAY INFORMED

Prevent an incident before it happens by using our in-country intelligence and best-in-class resources to support your risk assessment process.

INCLUSIVE EDUCATION

When risks are managed appropriately, everyone can participate, which means you can say 'yes', instead of having to say 'no'.

LEAD INNOVATION

Striving for excellence comes with the responsibility to lead, innovate and deliver best practice processes wherever possible. This applies to the education and safety of your students and staff, both in the classroom and beyond.

DEMONSTRATE COMPLIANCE

Risk mitigation is more than policies and procedures; prove to the school community that you are committed to delivering on your obligation to protect your students and staff.

BE SUPPORTED

Trust that your community is in the safe hands of the industry leader, with access to vetted, up-to-date information and the support of our doctors, nurses and security specialists, whenever and wherever you may need it.

PREVENTION PAYS

At a fraction of the cost of an excursion, give the whole school community peace of mind by protecting your school's reputation, and the wellbeing of your students and staff.

International SOS is the preferred travel risk management provider of ECIS

WHEN THE UNTHINKABLE HAPPENS MULTIPLE STAKEHOLDERS CAN BE IMPACTED

FIELD TRIP SUPPORT FROM INTERNATIONAL SOS
