16:15:58 From Kim Tyo-Dickerson To All Panelists : I was in my office and our DP Nature of Science class filed in, and then I heard BrainPOP for a science concept overview. It is used regularly in our high school classes for entry points, review, prior knowledge, building background knowledge.

16:22:36 From Melissa Cavender : Love delving deep into BrainPop—particularly useful to keep kids engaged as we are still teaching virtually.

16:24:02 From Courtney Park : Love having them look at each other's maps. That's a great idea.

16:25:54 From Courtney Park : Nice question. Way to know your audience!

16:26:39 From Jeremy Willette : That's super cool!

16:26:50 From Jeremy Willette : I've never made movies in BrainPop before.

16:26:57 From Courtney Park : Q: How long would it take a middle schooler to make a decent BrainPop movie? If they were really putting some effort into it.

16:27:04 From Jeremy Willette : Can totally see some of my MS students wanting to do this.

16:27:29 From Courtney Park : I love this idea.

16:27:45 From Melissa Cavender : Are the students logging in individually? We've got a school login right now.

16:29:12 From Kim Tyo-Dickerson To All Panelists : Our students authenticate with Google.

16:42:12 From Katrina Lehman To All Panelists : Thank-you!

16:42:17 From Courtney Park : I have to do a 2 day 'middle school creates' program and trying to come up with an idea. Wondering if I could stretch the movie to a 2 day project. Probably not....

16:42:28 From Jeremy Willette : Will BrainPop add more languages in the future?
